

BASEBALL NEWFOUNDLAND AND LABRADOR

THE VISION DEVELOPMENT CENTRE SETS ITS SIGHTS ON BASEBALL NL!

Baseball Newfoundland and Labrador is thrilled to announce its newest *Grand Slam* sponsor for the upcoming season, proudly welcoming The Vision Development Centre to the Baseball NL family for 2026!

Funds acquired from this sponsorship will be used to assist with grassroots program delivery throughout the upcoming season.

“The Vision Development Centre believe wholeheartedly in community outreach and engagement” said Dr. Sarah Hutchens, Optometrist and Founder of The Vision Development Centre. “With this newfound partnership, it is my hope that we can not only make a positive impact on grassroots programming in the province, but can also assist athletes with their individual eye health as they continue to grow and develop as athletes”.

As part of this partnership, The Vision Development Centre will also be engaging with Baseball NL’s High Performance Program athletes to create resources that can be used to assist with vision training specific to baseball.

“The Vision Development Centre’s partnership with Baseball NL is yet another reminder of the work being done by our members, volunteers, players, coaches, officials and parents province-wide to make our overall programming more beneficial to athletes at all levels” said Executive Director Ryan Garland. “With Dr. Hutchens’ recent experiences and opportunity to work with the Toronto Blue Jays during Spring Training, this partnership was really a no-brainer for us. It is a fantastic way to continue to develop our athletes and enhance their overall baseball experience”.

For more information on how you can become a Grand Slam sponsor, or on one of our other sponsorship packages, visit the Baseball NL [Corporate Sponsorship Packages](#) section of the Baseball NL website.

About The Vision Development Centre

Vision is more than 20/20. Eyesight and vision are different. Just because you can see the smallest letters on the eye chart does not mean that you have perfect vision. Eyesight is the physiological ability to see an image. Vision is your ability to understand what you see.

At The Vision Development Centre, we help athletes sharpen the visual skills that support performance in sport. From tracking a pitch to reacting under pressure, sports vision training focuses on the eye-brain connection that drives timing, coordination, and decision-making in baseball.
